COLD STORAGE REPORT  
AS OF MARCH 1, 1944

Reports from cold storage warehouses and meat-packing plants to the War Food administration permit the following analysis of the cold storage situation as of March 1, 1944.

There were heavier than normal withdrawals of frozen fruits, frozen vegetables and creamery butter from freezers during February. On the other hand accumulations of frozen eggs, frozen and cured beef, pork and trimmings and offal were far in excess of past performance for freezer commodities. There were some relatively slight reductions in holdings of frozen poultry and frozen lamb and mutton.

Over all cooler items indicated net increased use of cooler space on March 1. While holdings of apples were reduced during February, stocks of shell eggs, cheese and lard were increased materially. This is especially true for lard.

March 1, 1944 holdings of all commodities reported, with the exception of apples, were substantially heavier than those of March 1, 1943 and the March 1, 5-year (1939-43) average. Frozen fruit stocks were 29 percent greater than those of a year ago, frozen vegetables 107 percent heavier, creamery butter 792 percent, cheese 85 percent, frozen eggs 75 percent, poultry 117 percent, meats 50 percent and lard and rendered pork fat 190 percent.

The occupancy of refrigerated space on March 1 reflects the increased commodity tonnage during the month. Average occupancy of cooler space for the whole United States was 73 percent of capacity and freezer space 92 percent. These compare with 68 and 89 percent respectively for February 1.

1/ Reported to the Department of Agriculture as of June 16, 1941.

2/ Percentages for the periods covered here were made as comparable as possible.

3/ Preliminary.

4/ Weighted average of the occupancy for geographic divisions using the corresponding net piling space as weights.

## FRUITS AND VEGETABLES

Cold storage stocks of apples which totaled 10,535,000 bushels on March 1, 1944 were 6 million bushels below those of a year earlier and 5 million bushels below the March 1, 5-year (1939-43) average. Frozen fruit holdings were reduced during February by 23 million pounds. The 186.8 million pounds on hand March 1 were 41.6 millions greater than that of a year earlier and 64.8 million above average. The reduction in frozen vegetable holdings was 15.9 million pounds. March 1 stocks totaled 153.8 millions which quantity exceeds March 1, 1943 holdings by 78.9 millions and the average by 88 million pounds. The out-of-storage movement of both fruits and vegetables during the month was below that for the same period a year ago, but considerably heavier than average.

(See table on page 8 for March 1, 1944 holdings by geographic divisions)

## DAIRY AND POULTRY PRODUCTS

Stocks of creamery butter in cold storages were reduced during February 1944 by 22.8 million pounds. This left 107.5 million pounds on hand March 1. Of this amount Dairy Products Marketing Association and War Food Administration owned 74.5 million pounds. This indicates net withdrawals of WFA stocks during February of approximately 13 million pounds.

The major portion of the 74.5 million pounds of WFA stocks on March 1 will be used to meet lend-lease commitments, but a portion of the supplies are being transferred at the present time to the U. S. armed forces and used for Red Cross purposes and shipments to U. S. territories. The government's set aside order will be reinstated April 1 solely for the U. S. armed forces and war services which include the Veterans Administration and the War Shipping Administration. The War Food Administration will not buy butter in April, using present supplies to fill its commitments.

Stocks of cheese showed a slight increase during the month. March 1 stocks totaled 171.9 million pounds. DPMA and WFA holdings included in this quantity are reported as 66.2 million pounds.

Shell egg holdings were accumulated to the extent of 1,211,000 cases during February. There were 1,976,000 cases reported on hand on March 1, 1944. This quantity is 1,024,000 greater than that of a year ago and 1,569,000 cases above the 5-year (1939-43) average for March 1. Frozen egg stocks increased by 17.7 million pounds and the 99.4 million pounds on hand March 1 is 42.9 millions heavier than that of a year ago and 47.8 million pounds above average.

Frozen poultry holdings were reduced during the month by 19.6 million pounds. March 1, 1944 stocks were 220.4 million pounds or 118.7 million pounds above those of March 1, 1943 and 78.4 millions above average.

Includes stocks which may be set aside for future delivery to government agencies, stocks held for Army and Navy and some commercially held on which no specific information is available.

Includes 82,000 cases held by WFA.

Frozen eggs are converted on the basis of 37.5 pounds to the case.

SPECIAL NOTE: 80 percent of total frozen eggs reported as of March 1, 1944 were classified as follows: whites 22 percent; yolks 20 percent; and mixed 58 percent.

## MEATS AND LARD

The heavy accumulations of frozen and cured meats and lard noted for January continued through February. Beef stocks increased by 34.8 million pounds, pork by 146 million, trimmings and offal by 8.4 millions and lard and rendered pork fat by 106.2 million pounds. Stocks of all frozen and cured meats reported for March 1, 1944 totaled approximately 1.3 billion pounds.

Beef stocks, 276.3 million pounds on March 1 exceeded those of a year earlier by 174.1 millions and the 5-year (1939-43) average by 181.9 million pounds. Pork stocks, 792.7 million pounds, were 165.3 millions above a year ago and 146.9 million pounds above average. Trimmings, 151.3 million pounds, were 67.4 millions above the March 1, 1943 point and 58.6 million pounds above average.

Lard and rendered pork fat holdings totaled 354.3 million pounds or 232 million pounds heavier than a year ago and 146.8 million above average.

WFA holdings included in those figures are reported as 200.2 million pounds of lard and rendered pork fat and 34.6 million pounds of cured pork cuts.

(See table on page 9 for March 1, 1944 holdings by geographic divisions)
